WORK EXPERIENCE

Full Stack Developer

TransferMate Global Payments

Aug, 2018 - Present

Bengaluru, IN

Currently, working with TransferMate Global Payments. It provides smarter way to send and receive money internationally. Created Angular 7 architecture using custom NPM libraries, Angular Material and Flex layout. Developed Microservices based architecture in backend with SQS and lambda as a message broker. Created docker images for the backend services and angular application. Used TDD approach in all services to develop bug free application. Setup AWS ECS Fargate, S3, SQS and lambda for Dev, QA and Staging environments to deploy application using VSTS CI/CD release pipeline. Used Nexus Framework for project management and continuous delivery of project.

Angular Developer

ONE BCG

Feb, 2018 - Aug, 2018

Mohali, IN

Allied Wallet, a globally leading provider of online payment processing, multi-currency merchant services, and a PCI Level 1 secured payment gateway. I developed code to enable a new merchant in the NextGen system on acquirer side to allow the payments from specific card provider. Daily meetings with onshore and Allied Wallet engineering team via calls and emails to give status updates. Developed modules using Angular 6, C#, MVC. Extensive use of Web API through abstraction at different tiers of application. Used Code Analysis and StyleCop for peer code review.

ASP.NET Developer

Ariel Software Solutions

Jan, 2016 - Jan, 2018

Mohali, IN

I have worked on multiple projects with different domains by using ASP.NET MVC 5, ASP.NET core, Angular 2, MS SQL, VSTS, JQuery and Javascript. I was involved in communication with clients on a daily basis to understand and brainstorming of project requirements. Developed Angular 2 application from scratch by consuming web API.

EDUCATION

Bachelors in Information Technology

Punjab Technical University

Sep, 2009 - April, 2013

Mohali, IN

ACCOMPLISHMENTS

Travelled to QATAR for Qatar ministry of justice project handled by EBLA Computer Consultancy from 20 July, 2017 - 20 Jan, 2018. I have worked as Angularjs Developer on official application.
